

Mark R Hurle on 30-Oct-1995 13:23

To: Edward R Gimmi  
cc: Alem Truneh  
Subject: TNF-like and TNFR Genes

Ed,

Here's the info you requested.

novel full length TNF

413412 HTPAN08  
355074 HUVEO91  
875848 HLTBT71 (just deposited- we didn't talk about this)

novel full length TNFR

195197 HSABH13  
510304 HTXEI33 (splice variant of known human 41bb protein)  
355073 HT1SB52,HTOBH42,HLHAB49,HTOAU65 (coding sequences are identical)  
338803 HHFFT79 (splice of HLHAB49)

novel TNFR- not full length

231556 HTTBN61 (not yet full length- discovered at SB- second walk requested  
12/12/94)  
684257 HSAVO45 (not yet full length- homology to death domain of TNFR)  
615587 HROAG75 (contig appears to cover full length- contains intracellular domain  
of HLHAB49)  
340220 HMSBZ59 (may not be full length- splice of HLHAB49)
